SELFIEforTEACHERS can help teachers design their professional learning and support the development of their digital competence.

- Teachers can start their self-reflection at any point of time and use their results to identify their training needs.
- Teachers can set up and/or take part in a self-reflection with a group of teachers.

**SELFFIEforTEACHERS**
- Gives teachers the opportunity to reflect on their digital competence.
- Facilitates teachers to identify their learning needs.
- Empowers teachers to actively engage in the design of their professional learning on the use of digital technologies in teaching and their wider professional practice.
- Supports teachers to collaborate and share experiences and practices.

**CONTINUOUS PROFESSIONAL LEARNING PROCESS**

1. Take the self-reflection.
2. Receive the individual feedback report.
3. Design a professional learning plan.
4. Implement the plan – e.g. training courses, communities of practice, working with colleagues.
5. Apply new competences in professional practice.
6. Take the self-reflection again to see progress.

**SELFFIEforTEACHERS** is based on the European Framework for the Digital Competence of Educators (DigCompEdu) and is an initiative of the European Commission’s Digital Education Action Plan (2021-2027).
