

SELFIEforTEACHERS launch

Ljubljana, 5 October 2021 (hybrid event)

A new self-reflection online tool to support teachers to further develop their digital competence is launching on World Teachers' Day. SELFIEforTEACHERS has been designed by the European Commission working with experts from across Europe.

The tool gives primary and secondary teachers an opportunity to reflect on how they are using digital tools and technologies, get feedback and tips on next steps and plan for further training and support.

The European launch event is taking place on 5 October 2021 in cooperation with the Slovenian Presidency of the European Union.

The event brings together teachers who have tested the tool and students who will share their views on how they see technology as part of their learning experience.
